## DETAILED OFFICE ACTION

### Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

(I) **Claims 1-17** are drawn to a rotor structure in an alternator classified in class 310, subclass 263.

(II) **Claims 18-24** are drawn to method of attaching permanent magnets to a rotor of an alternator, classified in class 29, subclass 596.

The inventions are distinct, each from the other because of the following reasons: Inventions in groups I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different products or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case there are various methods to attach the permanent magnets to a rotor core including automatic machinery process and/or manual process, wherein each process having various orders of fabricating steps. Also, the method of attaching permanent magnets in a rotor in the present invention can be employed to form other magnetic elements in magnetic sensors, magnetic bearings, and magnetic switches that embody permanent magnets in the rotors.

A telephone call was made to Mr. Steven L. Oberholtzer, Reg. No. 30670, on 4/11/03 to request an oral election to the above restriction requirement, but Mr. Oberholtzer could not be reached; therefore, did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
